

MAHMOUD ELHOFY

Front-End Developer • Embedded Systems Developer

Email: mahmoudalhofy80@gmail.com | GitHub: github.com/MahmoudElhofyDev
LinkedIn: linkedin.com/in/mahmoud-elhofy-756a24423

PROFILE

Passionate Front-End and Embedded Systems Developer focused on building responsive, modern web interfaces, IoT solutions, and smart embedded projects. Adept at bridging software development with hardware control to create efficient, real-world applications.

SKILLS

HTML5 / CSS3

JavaScript

Python

MicroPython

ESP32

IoT

Embedded Systems

Sensors

Git & GitHub

Problem Solving

EDUCATION

High School Student

Focused on Computer Science, Electronics & Software Foundations

CERTIFICATES

Udacity Embedded Systems

Udacity

Udacity L1 & L2

Udacity Track Certifications

Sprix L1 & L2

Sprix Specialized Certifications

PROJECTS

Smart Mall Parking System

ESP32IoT SensorsMicroPython

Designed an automated smart parking system utilizing IR sensors and microcontrollers to monitor spot availability and display real-time status.

Personal Portfolio Website

HTML5CSS3JavaScriptGit

Developed a high-performance, dark-themed responsive portfolio showcasing web and embedded projects with clean UI/UX design.

Adventure Game Generator

PythonLogic BuildingOOP

Built an interactive text-based adventure game engine featuring dynamic narrative paths, inventory tracking, and state management.

Embedded Voltmeter

MicroPythonADCEmbedded Systems

Created a digital voltage measuring device reading analog signals via ADC and rendering precise voltage levels on display modules.

Embedded Input Reader

GPIOMicroPythonDebouncing

Implemented hardware input polling and interrupt-driven handling for smooth switch/button state detection in microcontrollers.
